Students entering under this rule will be termed Special Agricultural Students. They will not be subject to any maximum limit of age, but will not be entitled to the privileges conferred on passed students under rules 12 and 13, even though they should obtain fully-signed diplomas in due course after passing the necessary examinations.

Every candidate for admission to this Department must apply in writing to the Principal not later than the 14th July. The form of application for a nomination, which must be addressed to the Principal, is given in Appendix B. In the event of the form not being properly filled up and accompanied by the necessary certificates, no notice will be taken of the application.

The number to be nominated each year will depend on the accommodation available.

Every applicant, not already a student of the College, must undergo a medical examination by the College Surgeon before admission to this Department. If this officer's report is unsatisfactory, the applicant will not be admitted.

The session begins on the first Monday in November. All students are required to join the College on that day. Any student prevented by sickness from attending on the opening day must produce a certificate to that effect from a Civil or Assistant Surgeon, failing which he will be liable to a fine not exceeding Rs. 10. No student will be admitted or re-admitted to the College after the month of November, except by special orders of the Director of Public Instruction. THIS School is under the management of the Principal of the Patna College, assisted by a Board of Visitors. As far as accommodation is available, students who have passed the final *B* class examination will be admitted to the second-year class, provided they are not over 21 years of age, preference, again, being given to Biharis and domiciled Bengalis.

ACCOUNTS AND FINANCE.

PUBLIC DEBT.

No. 3912-A.

Calcutta, the 2nd July 1904.

THREE-AND-A-HALF PER CENT. LOAN.

His Excellency the Right Honourable the Governor General in Council has resolved to borrow three hundred lakhs of rupees for the public service in the following manner:

2. Promissory Notes will be issued for the said amount in the Form annexed to this Notification, being the form of the notes of *the Three-and-a-half Per Cent. Loan of 1900-01*, of which loan the notes to be now issued will form a part. All the conditions which apply to notes of *the Three-and-a-half Per Cent. Loan of 1900-01*, will apply to the notes to be now issued. The interest on the notes of that loan is payable half-yearly on the 30th day of June and the 31st day of December; and the notes are not liable to discharge before the 31st day of December 1920.

Tenders.

3. Tenders for the whole or any part of the said amount of Rs. 3,00,00,000 will be received by the Comptroller General from this date to noon of Wednesday, the 13th July next. Tenders must be for sums of 100 Rupees or multiples of that sum.

4. Each tender must be addressed, in the form annexed to this Notification, to the Comptroller General, Calcutta, and enclosed in a closed cover, superscribed "*Tender for the Three-and-a-half Per Cent. Loan.*" If the tenderer is not resident in India, he must name an agent resident in India to whom an allotment-certificate may be issued, if any part of the loan is allotted to such tenderer.

NOTE (1)—Tenders made in accordance with these instructions will also be received by the Accountants General at Madras, Bombay, Allahabad, and Lahore, on account of the Comptroller General, Calcutta, on the 12th July, and up to the local time corresponding to 12 o'clock in Calcutta on the 13th July; provided that—

(a) they are delivered personally or by clerk or messenger at the Accountant General's Office (where a receipt will be given for them);

(b) they are made on printed forms, to be obtained at the same office or at the local Presidency Bank;

(c) each tender is for not less than Rs. 10,000;

(d) the deposit is either a promissory note or a Treasury Receipt from the local Office of the Presidency Bank, or a cheque on a local Bank in favour of the Accountant General;

(e) the amount of the tender is made payable either at the place of tender or in Calcutta;

and the Accountant General will return deposits on non-accepted tenders and will issue allotment-certificates so far as the tenders are payable in Madras, Bombay, Allahabad, or Lahore.

NOTE (2)—Tenders made in accordance with these instructions will also be received at all Head and Sub-Post Offices up to a date to be notified at each Post Office. The date will vary according to the distance of the Post Office from Calcutta and will in no case be later than the forenoon of the 11th July. The following conditions must be complied with:

(a) the tenders must be delivered personally or by messenger at the Post Office, where a receipt will be given for them;

(b) they must be made on printed forms, to be obtained at the Post Office;

(c) each tender must be for not less than Rs. 100 and not more than Rs. 2,000;

(d) the deposit must be a receipt for the amount (which may not exceed Rs. 40 for each tender) from the Post Master of the Post Office at which the tender is made;

(e) the amount of the tender must be made payable either at the Head Post Office of tender (whether the tender was made at the Head Post Office or at one of its Sub-Offices) or in Calcutta. In the case, however, of a tender made at a Post Office in Calcutta, the amount of the tender must be made payable only at the Bank of Bengal.

The tenders will be transmitted by post by the Post Master to the Comptroller General so as to reach him before 11 A.M. on Wednesday, the 13th July. The Comptroller General will deal with them as if they had been made direct to him, returning deposits on non-accepted tenders through the Post Master.

5. The rate at which each tender is made must be specified in rupees or rupees and annas: a tender in which no rate is thus specified, but a subscription is offered in some other terms—as, for example, at the recorded minimum, or at some specified percentage in addition to the recorded minimum, or at the average of the accepted tenders—will be rejected as null and void.

6. The rate at which a tender is made must not contain a fraction of an anna: if a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out and the tender treated as if the rate did not contain such fraction of an anna.

Deposits.

7. Each tender must be accompanied by a deposit of not less than one-hundredth or, if the tender be for less than Five Lakhs of Rupees, then for not less than one-fiftieth part of the tender. The deposit must be in one of the following forms: (a) a receipt for the amount from the Head Office of the Bank of Bengal, or Madras, or Bombay, or one of their Branches, or from an officer in charge of some Public Treasury, or (b) a cheque drawn in favour of the Comptroller General on a Bank in Calcutta, Madras, Bombay, Allahabad, or Lahore, or (c) Government Promissory Notes [1] standing in the name of, or endorsed to, the tenderer or the person making the deposit. In the case of tenders made at Post Offices under note (2) to clause 4, the deposit must be a receipt for the amount from the Post Master of the Post Office at which the tender is made.

[1] *It is particularly requested that such Promissory Notes may NOT be endorsed to the Comptroller General.*

8. (a) Deposits, not being promissory notes, will, in the case of accepted tenders, be credited proportionately in part payment of the allotment-certificates issued in respect of the tender, and will bear interest for the purpose of clause 16 below from the date of the opening of tenders. When a tender is not accepted in full, the deposits, when they are not in the form of promissory notes, will be credited as far as possible proportionately in part payment of the allotment-certificates issued in respect of it. If any allotment-certificate is not fully taken up, the deposit credited in respect of it will be forfeited.

(b) Promissory notes deposited in respect of any accepted tender will be held until all the allotment-certificates issued in respect of the tender are paid up and will, if the allotment-certificates are not fully taken up, be appropriated by the Government and cancelled.

Opening of Tenders.

9. The minimum rate at which tenders will be accepted will be recorded under the signature of the Comptroller General, and, before the tenders are

opened, placed upon the table in a sealed envelope, but will not be declared unless some tender is rejected only because it is below the recorded minimum.

10. Tenders will be opened publicly by the Comptroller General at the Treasury Buildings, Calcutta, at noon (Calcutta time), on Wednesday, the 13th July next, and those received under the terms of note (1) to clause 4 will be similarly opened by the Accountants General at Madras, Bombay, Allahabad, and Lahore at the local time corresponding to noon Calcutta time, on the same day; but the contents of the tenders will not be disclosed otherwise than as provided in clause 12.

11. Tenders at rates not below the minimum rate will be accepted in the order of the rates tendered, beginning with the highest rate. The amount allotted at the lowest rate at which tenders are accepted will be divided amongst those who have tendered at this rate in proportion, as nearly as may be found convenient, to the amounts of their tenders; provided that no allotment will be issued if the amount distributable on any tender is less than Rs. 100: preference will however be given to small tenders, not exceeding Rs. 2,000, at the lowest accepted rate, such tenders receiving allotments in full as far as possible.

Allotment-Certificates.

12. To each tenderer (or to his agent) whose tender is accepted in whole or in part, such number of allotment-certificates as may be necessary to make up the aggregate amount allotted to him will be issued by the Comptroller General[1] as soon as possible after the 13th July and an alphabetical list of the names of those to whom such allotment-certificates are issued will be posted for general information at the Head Offices of the Banks of Bengal, Madras, and Bombay, and at the Branch Offices of the Bank of Bengal at Allahabad and Lahore.

[1] For tenders received by the Accountant General at Madras, Bombay, Allahabad, or Lahore, and payable at those places, the Accountant General will issue the allotment-certificates.

13. If the allotment made on any tender is less than Rs. 3,000, then the whole of the allotment-certificates [after credit of the deposit under clause 8 (*a*)] will be made payable upon the 22nd August.

Otherwise the whole amount of each allotment will be divided into three instalments as follows:

Instalment I.—As near as convenient to 35 per cent., but not exceeding 35 per cent., payable upon the 25th July:

Instalment II.—As near as convenient to 35 per cent., but not exceeding 35 per cent., payable upon the 22nd August:

Instalment III.—The balance payable upon the 19th September: and allotment-certificates will be issued for each instalment separately.

But the whole or any part of any accepted tender may be paid at any time after receipt of the allotment-certificates.

The words "as near as convenient" refer to the necessity for making each instalment an exact multiple of Rs. 100.

14. Any allotment-certificates will, on application to the Comptroller General, be exchanged for an equivalent amount of allotment-certificates of smaller denominations; provided that if any payment (beyond the deposit) is recorded upon the cancelled certificate, it can be taken against, and recorded upon, only one of the certificates issued in exchange.

15. Payment of any allotment-certificate may be made to the account of the Government in the Head Office of the Bank of Bengal, or Madras, or Bombay, or in any Branch of these Banks, or into any Public Treasury or Treasuries in India which may be named in the tender in respect of which it was issued. Receipts for such payments will be given by the Banks of Bengal, Madras, and Bombay, or their Branches, or by the officers in charge of the Government Treasuries at which payment is made, by enfacement upon the relative certificate. In the case of accepted tenders which were made at Post Offices other than Post Offices in Calcutta under note (2) to clause 4, payment of

allotment-certificates may also be made at the Head Post Office of tender, and the Head Post Master will give a receipt for such payment by enfacement upon the relative allotment-certificate.

Issue of Promissory Notes.

16. (*a*) When any allotment-certificate is fully paid up, the holder will, on presenting it duly receipted at the place where it was paid, obtain from the Public Debt Office, Calcutta, promissory notes of such values as he may desire (each note being in even hundreds and not less than Rs. 100) bearing interest from 31st December 1904, and he will also receive interest at 3½ per cent. per annum from the dates on which he may have made payment till the 30th December 1904.

(*b*) Or he may, at his option, by paying interest at the said rate from 30th June 1904 to the dates on which he may have made payment, obtain promissory notes as above, bearing interest from 30th June 1904.

RESOLUTION ON THE REPORT ON EMIGRATION FROM THE PORT OF CALCUTTA TO BRITISH AND FOREIGN COLONIES FOR THE YEAR 1903.

GENERAL DEPARTMENT—EMIGRATION.

Darjeeling, the 29th June 1904.

RESOLUTION—No. 1221T.—G.

READ—

The Annual Report on Emigration from the Port of Calcutta to British and Foreign Colonies for the year 1903.

Administrative measures.—The most important measure undertaken during the year under review was the framing of rules under Act X of 1902. This Act, which became law at the end of the year 1902, makes provision for the departure by sea out of India of Natives of India for the purpose of working as artisans, or of any entertainment or exhibition, or of service in any restaurant, tea-house or other place of public resort. Rules regulating the engagement of such persons for the purposes indicated above were framed during the year under review, and were finally sanctioned by the Governor-General in Council on the 9th March 1904.

2. *Requisition and despatch of labour.*—The number of Agencies recruiting emigrants was one less than in the previous year, the Agency for the Dutch Colony of Surinam, which despatched 1,254 emigrants during the previous year, having suspended operations during the year under review. The demand and supply of labour for the British Colonies were very nearly the same as in the previous year; the total number of adult labourers requisitioned and supplied during the year 1903 amounting to 9,893 and 8,794, as against 9,830 and 9,240 respectively in the year 1902. No emigrants were despatched to the Colony of Mauritius during the year, owing to the fact that arrangements could not be made to secure a vessel for the purpose before the close of the year.

The number of emigrants registered was 12,403, as against 13,807 in the year 1902, the decrease being attributed to the general prosperity of the agricultural classes during the year under review. As usual, the United Provinces of Agra and Oudh contributed the largest number of emigrants, nearly 62 *per cent.* of the total number of labourers registered being recruited in those Provinces.

3. *Depôts.*—Of 12,612 emigrants who were received in the sub-depôts, 10,787 actually arrived in Calcutta; and, if emigrants who were received in the previous year, those who were readmitted from hospitals after recovery, and infants born during the year be added to these, the total number accommodated in the depôts in Calcutta was 11,161, as against 13,329 in the year 1902. The percentage of deaths (·26) in the depôts was much smaller than in the preceding year, a satisfactory feature of the year being the noticeable decrease in the number of cases of cerebro-spinal meningitis.

The percentage of rejections at the depôts was 8·01, as against 7·44 in the preceding year. The Protector observes that the increase in the percentage is chiefly attributable to stricter medical examination of emigrants in the depôts before embarkation, but that it may also point to the fact that the medical examination of emigrants at the sub-depôts was not performed with sufficient care. The latter question, it may be observed, is one with which Government is only partially concerned. As noticed in paragraph 2 of Mr. Slacke's letter No. 158T.—G., dated the 13th May 1901, to the Government of India, the Emigration Agents make their own arrangements for the examination of emigrants; and it is only when Government officers are employed by them, and subsequent events show that the examination made by such officers has been perfunctory, that Government is called upon to interfere. No such complaints were brought to notice during the year under review.

4. *Embarkation of emigrants.*—The number of emigrants who embarked for the Colonies during the year was 9,084, or 1,798 less than in 1902, the largest number (2,937) being despatched to Demerara. The number of returned emigrants who re-engaged was 378, as against 435 in the previous year.

5. *Returned emigrants and remittances from immigrants in the Colonies.*—

(*a*) During the year 4,686 immigrants returned from the Colonies with aggregate savings amounting to Rs. 7,81,643-13-8, the average for each immigrant amounting to Rs. 166-12-10. On the other hand, as many as 1,050 adults, or 22·40 *per cent.* of the total number of returned emigrants, brought back no savings.

(*b*) As in the previous year, the largest remittances by money-order came from the resident immigrants of Natal, the total sum so sent amounting to over 15 lakhs. In the Mauritius the comparative smallness of the remittances is reported to be due to the fact that Indian emigrants settle there permanently with their families, and thus have no occasion to remit money to India.

6. The thanks of the Lieutenant-Governor are due to Dr. Forsyth and Dr. Banks, who held the office of Protector of Emigrants during the year under review, for their careful administration of the Department.

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1903.

No. 2055J.—D.

POLICE.

Dated Darjeeling, the 29th June 1904.

RESOLUTION.

READ—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1903.

The Reports for the two previous years and the orders of Government recorded thereon.

The Report of the Commissioner of Police, Calcutta, for the year 1903 has been punctually submitted and, as directed last year, has been made shorter than former reports.

2. Mr. R. A. D'O. Bignell held charge of the office of Commissioner of Police throughout the year. There was no change in the sanctioned strength of the force under his control, but at the close of the year there was a large number of vacancies in the ranks of the constables. These vacancies the Commissioner ascribes partly to the fact that a constable's present pay compares unfavourably with what he can earn as a *darwan* in private employ, and partly to more strict supervision of the force, which has led to more work being required of them simultaneously with a decrease of illicit gains. Proposals for the increase of pay of the constables are under the consideration of Government.

Judged by the increase in the number of dismissals from service of officers and men and by the large number of departmental punishments, the discipline of the force during the year was not as good as could be desired. The departmental punishments require the Commissioner's careful consideration. There were 21 judicial convictions, but few of the offences charged were of a serious nature.

3. The total number of cognizable cases reported during the year was 38,853, of which the large majority were as usual petty charges under the Calcutta Police Act, the Cruelty to Animals Act, and cases of public and local nuisances. The total shows an increase of 9,249 on the number reported during 1902, but is similar to the figures for the three years preceding 1901, when there was a sudden drop from 38,353 to 25,115 cases, which was attributed to abstention on the part of the police from dealing with public nuisances, and especially with cases of traffic obstruction as the result of the severe strictures passed on their conduct in connection with the strike amongst carters and hackney carriage drivers which occurred in Calcutta in that year. The number of cases instituted under the Police Act in 1903 was 11,979, which exceeds the figures for 1899 and 1900. The figures indicate that the Calcutta Police have recovered confidence in dealing with public nuisances, and the Lieutenant-Governor trusts that under better supervision the force will keep the right mean between excess of zeal on the one hand and neglect of duty on the other.

4. After elimination of offences of a petty nature the statements show 6,125 cognizable cases reported in 1903 as against 4,926 and 5,221 in the two preceding years. Practically the whole of this increase is under the heads of theft and burglary cases, and is due, as the Commissioner of Police considers, to improved reporting. The explanation involves the conclusion that in previous years the reporting of these classes of offences must have been extremely bad. But it is observed that in spite of the large increase in the number of these cases reported to the police, the number actually brought

to trial was smaller than in the preceding year. It is notorious that in Calcutta the serious crime against property is in great part committed by professional criminals, and there appears reason to fear that the increase is real and the result of greater activity on the part of the criminal classes, and less success on the part of the police in dealing with them. In this connection it is noticed that whereas in 1902, 299 cases of vagrancy and bad character were brought before the courts, in 1903 this number fell to 203. The Lieutenant-Governor trusts that these figures are not indicative of failure on the part of the police to take full advantage of the preventive powers conferred on them by law.

5. In the Courts the results of the cases sent up for trial by the Police have been very satisfactory. Of the total number of police cases sent up, 97 per cent. ended in conviction. Of 93 cases coming before the Sessions 82 ended in conviction; and in the theft and burglary cases in which arrests were made the percentage of convictions was high. The number of old offenders reconvicted during the year was 749: of these, 57 were dealt with by the Courts of Sessions. More commitments of old offenders were made in the previous year, but having regard to the fact that of offenders reconvicted no fewer than 261 had four or more previous convictions against them, His Honour is not satisfied that commitment was made by the courts in all cases where it should have been.

6. The number of cases declared false has steadily increased during the last four years, and in 1903 rose to 167. In only 21 of these cases were prosecutions instituted; and in only 3 of the 11 cases in which the prosecution was brought to a conclusion was sentence of imprisonment imposed. Such results can have no deterrent effect against false accusations; and more frequent and thorough prosecution and more adequate punishment of persons who bring false charges are clearly required. The Lieutenant-Governor hopes that the Police and the Magistrates will give more attention to this matter.

7. There was a falling off in the numbers of youthful offenders dealt with under the Reformatory Schools Act, and under section 562, Criminal Procedure Code. These provisions of the law should be carefully remembered by the courts.

8. The number of non-cognizable cases instituted before the Magistrates during the year fell to 13,669 as against 14,638 in the preceding year. His Honour is glad to notice a large decrease in the number of these cases pending at the close of the year.

9. The Lieutenant-Governor desires to express his appreciation of the good work done during the year by the Commissioner and his subordinate officers.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, for information and for communication to the Presidency Magistrates.

Ordered that a copy of the Resolution be forwarded to the Commissioner of the Presidency Division, the Chairman of the Corporation of Calcutta, and the Municipal Department of this Government for information.

Ordered also that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

Offg. Chief Secy. to the Govt. of Bengal.

Transactions on account of Government are included in the statements in paragraphs 1 and 3, but excluded from all others in this report, being dealt with separately in paragraphs 48 and 56.

The aggregate sea-borne trade of Bengal has risen in the past year by 11·2 per cent. in value, and represents the highest aggregate total since 1875-76. The foreign trade rose in value by 11·6 per cent. and the coasting trade by 8·8 per cent. In the former both merchandise and treasure have risen in value, with the exception of exports of the *precious metals*. In the coasting trade imports of foreign merchandise and of *silver* alone declined. Calcutta absorbed 97·3 per cent. of the foreign trade, Chittagong 2·3 per cent.

and the remaining ports ·3 per cent. Of the aggregate value of the coasting trade 89·3 appertained to Calcutta, 7·2 per cent. to Chittagong. Amalgamating both the foreign and the coasting trade of the Presidency, Calcutta appropriated 96·3 per cent., Chittagong 2·9 per cent., Balasore ·4 per cent., Cuttack ·2 per cent., Puri ·06 per cent., and Narayanganj ·1 per cent.

* In this and all other statements in this review showing rupees, the value is stated in lakhs only followed by two places of decimals (which is equivalent to omitting "000").

Trade rose in value in the past year by 10·95 per cent., and the aggregate total is higher than that of any year since 1875-76. Both the foreign and the coasting trade participated in the increase. Treasure is shewn separately in the table, and the result of the movements of both bullion and specie in the foreign and coasting trade was a net importation of 7½ crores, or an increase of 81·6 per cent. on the previous year. In the foreign trade the net importation was 9½ crores, or an advance of 95·5 per cent.: large quantities of *gold* were received and a slightly greater amount of *silver* and, at the same time, the exports of both the metals were much smaller. Movements of treasure in the coasting trade culminated in a net exportation of 2 crores: large quantities of both *gold* and *silver* were sent to Burma, mainly by the State. Merchandise exported in the foreign trade was greater than that imported by 20 crores, or 54·04 per cent. and the aggregate trade of both combined was greater by 22 crores, or 52·2 per cent. Details of fluctuations in merchandise will be found in the statements for imports and exports which follow. Imports of merchandise from foreign countries were greatest in April, August and October and lowest in June, July and December. Similarly exports of Indian produce attained their greatest values in the months of October, November and January: the smallest business was transacted in April, May and June.

4. In the coasting trade the value of goods imported rose by 2·8 and that of goods exported by 6 per cent., the aggregate trade showing a rise by 4·5 per cent. In imports of Indian produce, *kerosine oil* and *cocoanut oil* increased considerably, but there was again a large falling off in *grain and pulse* and *cotton twist and yarn*. Exports advanced in value through larger shipments of *grain and pulse*, *oils* and *provision*, but a shrinkage occurred in *jute manufactures*, *opium*, *tobacco leaf* and *cotton goods*.

There was a strong reaction in the past year from the fall in prices of the two previous years. Compared with the previous year the aggregate total has risen by 4·2 per cent. and the total was only 2·6 per cent. less than the standard year. Both imports and exports have risen in average price: the former by 3 and the latter by 4·9 per cent. Under imports only *iron sheets* and *steel* have fallen in price in the past year. Exports have decreased in so far as *coal, indigo, rice, wheat, raw jute, gunny-bags, linseed* and *raw silk* are concerned. Taking the aggregate volume at the average values ruling in the previous year, it will be perceived that the average actual aggregate value for the past year's trade has risen by 4·6 per cent.: imports increased by 7·7 and exports by 3·7 per cent.

In imports there was an advance in every group excepting III(D), V and VII(A), while in VII(B) no change existed. Group I consisted chiefly of *horses*. The advance in group II was entirely in *sugar* and that in group III(B) was distributed in an equal ratio between *zinc*, *copper* and *lead*. *Machinery other sorts* accounted for the rise in group III(C) and *locomotive engines with tenders* for the fall in group III(D). *Precious stones and pearls, unset* represented the advance in group VI while a smaller trade in *cotton manufactures* was responsible for the decline in VII (A). The remainder call for no remark.

7. In exports a rise was recorded in every group except III(C), V and VII(B). The advance in group II was in *wheat* and *tea*, in group IV in *opium*, while *raw hides* and *jute* accounted for the increase in group VI. *Jute manufactures* were responsible for the advance in group VII(A) and *shellac* for that in VII(C). The other figures do not call for any remark.

Regarding the distribution of trade with the different countries, it is to be noted that the figures throughout this report refer only to the port of destination or exportation as shown in shipping-bills and bills-of-entry, and are not to be taken to indicate either the country of final destination or of production.

As usual, the more important items are dealt with separately in this review. But there are others meriting consideration by reason of the great variations that have occurred in the total values in the year under review in comparison with the previous one.

The chief is *jewellery*, where the increase has again been very large (53·6 per cent.) by reason of the large imports of *precious stones* and *pearls*.. This is no doubt due to the great and continued prosperity of the country. Greater scientific research has influenced favourably the value of *instruments and apparatus*. The heavy imports of *paints and colours* in the previous year have caused a decrease in the year under review. Buildings of all kinds have considerably increased and this has been the reason for much larger importations of *timber* from Canada and United States, and of *asphalt* from the United Kingdom. *Tea-chests* have shewn little variation in the past year in spite of the larger outturn of *tea*, but the preference in the past year set in for *wood* as against *metal-boxes*. Very few boxes continue to come from coast-ports: it is believed that in Assam the indents on local supplies have considerably increased.

A large demand from the United Kingdom and Germany for *animal bones* caused a considerable rise in the value of *manures* equivalent to 22·3 per cent. *Apparel* fell by 37 per cent. owing to a very much smaller quantity of *boots and shoes* going to Natal and Cape Colony. The increase in *woollen manufactures* of 26·8 per cent. was due to a greater demand for *carpets* from the United Kingdom. Much more *fodder* went to the Straits Settlements, the Philippines, and Germany, and the increase in value was 18·9 per cent. A considerable demand sprang up in the past year from the United Kingdom for *bristles* and, as a consequence, the value rose by 59·3 per cent. More *chillies* exported to Ceylon and the Straits Settlements account for the increased value of 58·2 per cent. under *spices*.

47. DISTRIBUTION OF FOREIGN TRADE OF CALCUTTA BY COUNTRIES.

The following table shows how the trade of Calcutta with foreign countries was distributed in the past three years:—

	Imports.			Exports.			Percentage which the total of each country bears to the whole.

Fluctuations in specific articles have already been noticed: the fluctuations in specific countries and groups of countries remain to be examined.

The value of the trade of Calcutta passing through the Suez Canal was 72 crores, against 68⅓ crores in 1902-1903, and the proportion of the total trade using this route decreased from 74·8 to 71·7 per cent.

United Kingdom.—The proportion of the trade of Calcutta with the United Kingdom decreased by 4·9 per cent. although both imports and exports increased in value, the former by 32¾ lakhs, and the latter by 173½ lakhs. Under imports the advance was to be observed chiefly in *machinery and millwork*, *metals* and *woollen goods* and to a smaller extent in *hardware and cutlery*, *salt*, *drugs, &c.*, *instruments and apparatus* and *oils*. There was, however, a heavy decline of 58½ lakhs in *cotton goods* and a falling off of 14⅝ lakhs in *railway plant and rolling stock*. A decrease also occurred in *liquors*, *apparel*, *provisions*, *chemicals*, and *paints and colours*. Under exports the value of shipments of *grain and pulse*, advanced by one crore and that of *tea* and *lac* by 49 and 48 lakhs respectively; on the other hand, there was a decline in *raw jute*, of 14½ lakhs, and in *jute manufactures* and *raw silk* of 10 lakhs apiece.

Continent of Europe.—The check received by Continental trade in 1901-1902 and 1902-1903 was removed in the past year, and the total trade rose in value by 84 lakhs. Imports decreased by 3 lakhs only, but exports advanced by 87 lakhs. This advance was shared by all countries except France and Russia. The decline in imports was caused by smaller receipts of *kerosine oil* from Russia, while the advance in exports was chiefly in *grain and pulse* to Belgium and in *hides and skins*, *oilseeds*, *lac*, *grain and pulse* to Germany. The marked increase in value of exports to Belgium was largely due to the fact that a direct line of steamers from Calcutta to Antwerp was established in the past year.

United States of America.—The trade with this country improved by half a crore. Imports advanced by 1⅓ lakhs: *lac* and *raw jute* are alone responsible for the rise in exports.

South America.—The advance of 63 lakhs in exports to this country was entirely in shipments of *gunny-bags*.

Rest of America.—The advance here also was entirely in shipment of *gunny-bags*.

Mauritius, Cape Colony and Natal.—The total trade increased by 5 lakhs. Imports expanded by 34 lakhs, due to a better trade in *sugar* from Mauritius and in *gold* from Natal, but exports contracted by 29 lakhs owing to a smaller business in *gunny-bags*.

Eastern Asia.—A net increase of 46 lakhs was recorded in this trade: imports increased by 54½ lakhs and exports by 7½. In the case of imports larger receipts of *sugar* from Java, more *copper* and *matches* from *Japan* and more *tin* from the Straits Settlements account for the advance. In exports there was a great improvement in the value of *opium* shipments to the Straits Settlements and Cochin-China, which was, however, to a great extent counteracted by a heavy decline in *gunny-bags* shipped to the Straits Settlements.

Western Asia.—This trade advanced by 11 lakhs, imports falling off by 2 lakhs and exports increasing by 13 lakhs. Less *salt* from Aden, Arabia and Persia was the cause of the former, while a bigger trade in *rice* to Aden more than accounts for the improvement in the latter.

Egypt.—Imports improved by one lakh owing to a better trade in *sugar*. The export trade to this country has hitherto been unduly swelled by goods being shipped to Port Said "for orders," the real destination not being disclosed. No such shipments were made in the past year, with the result that there was a decline of 17¼ lakhs in value, which is to be found under *oilseeds* only.

Rest of Africa.—The trade was unimportant.

Ceylon.—Trade again receded in value in the past year, the decline being 69 lakhs; 25¾ lakhs of which were in imports and 43½ in exports. With regard to imports, *gold* from Australia, transhipped at Colombo, and *cocoanut oil* were the chief causes of the decrease, while with regard to exports the necessity did not exist for sending so much *gold* and *silver* to Ceylon. There was also a smaller trade in *rice* and *coal*.

Australasia.—A remarkable expansion of 407 lakhs in this trade was recorded. Imports advanced by 365 lakhs and exports by 42 lakhs: *gold* accounts for the whole of the increase under imports, and *gunny-bags* and *gunny-cloth* for the improvement in exports. Shipments of *tea* also improved.

SHIPPING.

FOREIGN TRADE.

49. The number of vessels and their total tonnage engaged in the foreign trade of Calcutta during the past year showed an increase, the figures for entries and clearances taken together being 1,157 vessels and 3,033,244 tons, with a higher average tonnage per vessel. The advance was 65 vessels and 244,335 tons over the previous year's figures, representing 5·9 and 8·7 per cent., respectively. British vessels continue to absorb the bulk of the carrying trade of Calcutta, though the vessels of other nationalities have been participating in a larger share each year, and German steamers now occupy the second place of importance, the increase in the latter being 7 vessels and 21,885 tons among those that entered inwards with cargo and ballast, and 13 vessels and 42,480 tons among those that cleared from the port. A satisfactory feature in the shipping tables was that most of the vessels which entered from foreign ports in ballast were able to secure cargoes, although freight rates in the past year were not specially attractive.

It may be mentioned that in the year 1903-1904 three new direct lines of steamers were established—for Antwerp, for Venice, and for the Javanese ports. Two vessels also in the past year cleared from Calcutta for Russian ports on the Black Sea.

50. Rates of freight in the beginning of the year were high, but in consequence of small arrivals of produce from the interior not much business was done. There was a demand later for shipping and a considerable amount of business was put through, but without any appreciable advance in freights. At the beginning of the cold season, however, freights declined, owing probably to the large number of steamers arriving in ballast both in the foreign trade and from coast ports, some vessels having arrived from the Far East in search of cargo, and a large amount of shipping was engaged. At the close of the year the freight market became firmer with a rise in rates.

CUSTOMS REVENUE.

FOREIGN TRADE.

51. No change was made in the past year in the incidence of taxation so far as the ordinary import duties were concerned, but by a notification (No. 7249S.R., dated the 2nd December 1903) the Government of India remitted in respect of any country, which was a party to the Brussels Convention, all countervailing duties on *sugar* produced after the 31st August 1903. Also under Act No. IX of 1903 and from the 1st April of that year, a cess of ¼ of a pie per pound was levied on all *tea* produced in India and exported from any customs port beyond the limits of British India. This cess brought in during the year a net sum of Rs. 2,15,870.

The gross revenue collected in the past year from customs duties was Rs. 3,62,34,853, or a decrease of 13·3 per cent. If to this be added the revenue collected on *salt* imported into Calcutta, but paid into district treasuries for clearance of salt from inland bonded warehouses, and which amounted in the past year to Rs. 26,35,505, the gross revenue amounts to Rs. 3,88,70,358, or a decrease on the whole of 13·3 per cent. After deduction of refunds and drawbacks, the net revenue that remained was Rs. 3,82,18,192, or 13·8 per cent. less than in the previous year. The decrease is mainly due to the reduction in salt duty from Rs. 2-8 to Rs. 2 per Indian maund: on general merchandise the revenue fell by 6·4 per cent., the total gross collections having been Rs. 3,88,70,358. The reduction in salt duty represented a loss of Rs. 55,86,808, but, owing to the larger consumption (an increase of 2,59,332 maunds), the actual loss was only Rs. 50,68,144.

As shown above there was a decrease in the revenue from *salt* of Rs. 49,38,478 (inclusive of inland warehouse payments): also, owing to the keen competition of *Burma oil*, the revenue from *mineral oils* contracted by Rs. 6,61,279. The countervailing duties on *sugar* have dropped in the past year to only Rs. 36,753. *Liquors*, *woollen goods* and "other" articles, all exhibit better collections in the past year; but owing to smaller imports of *silver*, *metals* fell off slightly in revenue, and the duty on *cotton goods* was adversely affected by the higher price of the raw material. Excise duty on local *cotton manufactures* rose again from Rs. 6,605 to Rs. 10,907-14, or by 65·1 per cent. It is stated this is probably due to mills finding it more profitable to weave, there being always a demand for *cotton listing* and *banding*. Refunds and drawbacks increased again in the past year and by 27·1 per cent., the revenue repaid being Rs. 6,52,166 as compared with Rs. 5,12,895. Drawbacks showed but little variation on the previous year and the total was only Rs. 29,775, but refunds included Rs. 1,39,613 on *arms*, or 24·5 per cent. more than in the previous year, and on *sugar* the payments were Rs. 2,24,960, or an advance of Rs. 54·3 per cent. For *salt*, refunds rose to Rs. 1,63,280, or by 29·4 per cent. *Arms*, *sugar* and *salt* represent 80·9 per cent. of the total payments made.

MARINE DEPARTMENT.

Dated Calcutta, the 2nd July 1904.

RESOLUTION.

Annual Reports on the working of the Shipping Offices at Calcutta, Chittagong, and Orissa Ports for 1903-1904.

READ—

Letter No. 309S. of 9th May 1904, from the Shipping Master, Calcutta.

Memorandum No. 4165B. of 6th May 1904, from the Secretary to the Board of Revenue, Lower Provinces.

Letter No. 419C. of 25th April 1904, from the Commissioner, Orissa Division.

The receipts of the Calcutta Shipping Office during the year amounted to Rs. 78,751, against Rs. 71,668 during the previous year, showing an increase of Rs. 7,083. This is mainly due to an increase under shipping, discharging, and overtime fees. Receipts from the sale of discharge certificates again showed a large falling off, but this was due to the former charge of eight annas for each certificate having been reduced to four annas.

2. The expenditure showed a small increase of Rs. 5,234, the figures being Rs. 31,574, against Rs. 27,339 in 1902-1903. There were small increases under most heads of expenditure, but the total increase was mainly caused by the large expenditure incurred on account of forms supplied during the year, and also to a stock required for the new branch Shipping Office at Kidderpore.

3. The receipts under "Trust Funds" amounted to Rs. 80,202, which, with the balance of Rs. 12,643 unpaid from the previous year, made up a balance of Rs. 92,845. The receipts showed a reduction of Rs. 2,536 on the previous year, and was due to a greater number of crews having been paid up and discharged at ports other than Calcutta. The disbursements amounted to Rs. 82,856, and of the balance remaining unpaid Rs. 941 lapsed to the State.

The number of seamen shipped and discharged were—

Shipped	41,675
Discharged	36,147

4. There was a decrease of 206 in the number of seamen shipped under European Articles, and this decrease has been going on for some years past, with the exception of last year when there was an increase of 134. This decrease, coupled with the fact that the number shipped under Indian Articles has increased, tends to show that lascars are coming more and more into favour with Masters of vessels who, it is said, find them less expensive and more amenable to discipline. Similarly, under the numbers discharged, there was a decrease of 140 under European Articles and an increase of 3,703 under Indian Articles.

5. In addition to these figures, 42 seamen were shipped and 17 discharged by foreign Consuls.

6. The number of distressed seamen sent home increased from 46 to 65, and this is partly accounted for by the number of seamen discharged in hospital being greater than last year.

7. The value of the money-orders sent by European seamen again fell from Rs. 16,154 to Rs. 7,721. These transactions, as a rule, follow the rise and fall in the numbers of seamen shipped and discharged under European Articles.

8. During the year a complaint was received from the India Office, through the Secretary of State, that there was reason to believe that at certain Indian ports, and notably Calcutta, commissions were given by lascars to the serangs and tindals under whom they served, and by them to ghat serangs for employment on boardship. Enquiry showed that the evil did exist, but to what extent it was impossible to ascertain. In order to remedy this state of affairs, the Port Officer, with the concurrence of the Agents of the Steamer Companies, now deputes the Deputy Shipping Master to select serangs for such vessels as require their crews to join at outports. A printed slip is attached to the Shipping Articles to the effect that no one either on board or on shore is entitled to deduct any money; the crew being at the same time warned that all attempts at extortion should be immediately reported. One case of an attempt to extort money by threats was successfully prosecuted and the serang sentenced to pay a fine of Rs. 200, and two other cases of bribery and extortion are still *sub judice*. A fourth case fell through, as the seamen concerned were unwilling to lodge their complaint before a Magistrate owing to frequent adjournments in previous cases.

9. Two cases of attempted murder on the high seas were also reported, but on careful enquiry both cases were found to be false.

10. The figures of the year under review justify the view previously expressed by the Shipping Master on the probability of Indian crews gradually replacing Europeans. Apart from the question of expense, there is no doubt in the opinion of the Shipping Master that Europeans give far more trouble to Masters and Officers generally and, whenever possible, Masters gladly substitute Natives for Europeans.

11. The final orders of the Government of India were received during the year on the question of overtime fees to Officers in the Shipping Departments. It has been decided that the ordinary working hours of a Shipping Office shall be from 9 A.M. to 6 P.M., and that no fees will be levied for any work done ashore, either out of office hours or on Sundays or holidays. Certain fees have been sanctioned both for Calcutta and Chittagong for shipping and discharging crews *afloat* out of office hours and on Sundays and holidays.

12. At the port of Chittagong the number of seamen shipped and discharged was 75 and 876, against 32 and 366 during 1902-1903. These numbers are showing increases every year.

13. The receipts amounted to Rs. 1,659, against Rs. 690 during the previous year, or an increase of Rs. 969. The main cause of the additional revenue is due to the increase in the number of seamen shipped and discharged. Under fines and forfeiture, there is an increase of Rs 218 due to fines inflicted by Commanders of vessels on their crews for violation of the terms of agreement and to forfeiture of wages of deserters. There were no disbursements.

14. The receipts from Trust Funds amounted to Rs. 69,631. With the exception of Rs. 9-8, the whole of it was disbursed.

15. During the year the Shipping Master visited 86 vessels to enquire into matters affecting the vessel. No complaints were received.

16. Twenty-five seamen were admitted into hospital, of whom 17 were cured and 8 relieved. The latter left at their own request. Although the number admitted into hospital shows a small increase due to a large number of vessels visiting the port, the general health of the shipping was good, and no cases of scurvy or other diseases resulting from bad or insufficient food were reported during the year.

17. No seamen were shipped or discharged during the year at False Point, but at Chandbali one native craft discharged all her crew, consisting of seven men and two apprentices without paying them their wages and the necessary expenses to their homes at Cutch. They were left in great distress, but on an enquiry being held by the Shipping Master, a sum of Rs. 420-11-5 was realised from the owners and disbursed to the crew. It is, however, not understood how the crew were at first discharged without being paid their just dues, and the Shipping Master should explain whether the discharge was effected through the Shipping Office or irregularly.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Secretary to the Govt. of Bengal.

Registrar of Companies.

REPORT UNDER SECTION 41 OF BENGAL ACT I OF 1893 ON THE WAREHOUSES IN HOWRAH FOR THE YEAR ENDING 31ST MARCH 1904.

No. 2019L.S.-G.—The 1st July 1904.—The following report is published for general information.

L. P. SHIRRES,
Secy. to the Govt. of Bengal.

Dated Howrah, the 22nd May 1904.

From—J. F. GRAHAM, ESQ., Chairman of the Howrah Municipality,
To—The Magistrate of Howrah.

I HAVE the honour to report that 267 warehouses were licensed in 1903-1904 out of 325 registered during that year, against 270 out of 305 registered in 1902-1903, the details being as follows:—

Years.	Jute.	Cotton.	Straw.	Wood.	Hay.	Total.
Registered, 1902-1903 ...	34	34	65	180	2	305
Ditto, 1903-1904 ...	34	36	53	201	1	325
Licensed 1902-1903 ...	29	33	44	163	1	270
Ditto, 1903-1904 ...	28	30	36	172	1	267

2. Formerly 5½ per cent. was the proportionate liability of the Howrah Municipality towards the cost and maintenance of the Metropolitan Fire-brigade, but in 1903-1904 the percentage was raised from 5½ to 11 (*vide* Bengal Government letter No. 1028T.—M., dated 23rd June 1902). Hence the license fee on jute warehouses was increased from 3¾ per cent. to 6 per cent., and on cotton and other warehouses from 2½ per cent. to 5 per cent. by a Resolution of the Commissioners at their Ordinary General Meeting held on the 5th September 1902. Again the Commissioners at their Ordinary General Meeting, held on the 21st August 1903, reduced the license fee on jute warehouses from 6 to 5 per cent., on cotton warehouses from 5 to 3 per cent., on wood from 5 to 4 per cent., and on the rest from 5 to 2½ per cent. with effect from the second half of 1903-1904, but resolved that an amount up to Rs. 1,058 be paid from the General Fund if there were any deficit. Accordingly in 1903-1904 the license fee on jute was levied at an average rate of 5½ per cent., on cotton at an average rate of 4 per cent., on wood at an average rate of 4½ per cent., and on the rest at an average rate of 3¾ per cent.

3. The income from license fees during the year under report amounted to Rs. 10,938 (of which Rs. 534 were arrears for 1902-1903, Rs. 1,297 were collected in advance in 1902-1903 for 1903-1904 and Rs. 485-8-6 are to be set off in 1904-1905 against those persons who paid their license fees at the beginning of this year at 6 per cent. on jute and 5 per cent. on wood and others—*vide* Resolution No. 5, dated 5th September 1902, and Chairman's orders dated 21st and 27th August 1903) against Rs. 7,941 (of which Rs. 183 were on account of

arrears for 1901-1902, and Rs. 1,297 on account of license fees for 1903-1904 collected in advance in 1902-1903) in 1902-1903.

4. Formerly *ulu* grass was assessed under the Municipal Act, but in 1903-1904 *ulu* and waste paper were made subject to the operation of the Licensed Warehouse and Fire-brigade Act—*vide* Government Notification No. 2772M., dated 12th November 1903.

5. The demand, collection, remission and balance for 1903-1904 are shewn in Appendix A. The details of jute and cotton warehouses registered and of licenses granted during the year are entered in Appendix B. Owing to the comparative unimportance of the 209 licenses granted for the storage of straw, wood and hay in 1903-1904 against 208 in the previous year, they have not been entered in Appendix B, and it may be noted that such license fees have only been levied under the Fire-brigade Act since July 1893, prior to which they were levied under section 261 of the Bengal Municipal Act.

6. There were 44 prosecutions in the year under review, which realized in fines Rs. 244-8 as against 40 in the previous year when Rs. 161 was realized.

7. The expenditure incurred in assessing and collecting license fees amounted to Rs. 930 as detailed below:—

		Rs.
Salary of General Supervisor and Assessor	...	600
Ditto Inspector, including commission	...	234
Ditto clerk ...	...	45
Ditto peon ...	...	48
Contingencies ...	...	3
Total	...	930

8. The Fire-brigade establishment continued under the control of the Commissioner of Police, Calcutta. The Fire-brigade station in Howrah stands in a very central position north of the Municipal market, and from a wooden stage raised above it the whole town is overlooked. There were 14 fires during the year, the details of which are given in Appendix C. There were also 8 other petty fires, at all of which the Fire-brigade attended while they were extinguished by residents of the localities.

9. The Commissioner of Police demanded Rs. 9,264 for the maintenance of the Fire-brigade in 1903-1904, and this amount was remitted to him during the year.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; g, gloomy, d, drizzling rain, p, passing temporary showers.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

The following Notices are published for general information.

D. B. Horn,
Secretary, Marine Department.

Calcutta, *the 8th July 1904.*

NEW ZEALAND—South island, east coast.

Jack's point—Intended light.

No. 232 (first publication).—The British Admiralty has given notice (No. 442 of 1904) that during June a *white fixed* light, elevated 67 feet above high water, and visible in clear weather from a distance of 10 miles, will be established on a point known as Jack's point, situated about 3 miles southward of Timaru. The light is of the 4th order, and will be visible from the bearing of north, through west, to S. 12° W.; it has been placed on the Chart on the rocky point situated 2¼ miles S. 12° W. from Patiti point.

Approximate position, lat. 44° 26¾′ S., long. 171° 17¼′ E.

(Variation 16° Easterly in 1904.)

AUSTRALIA—Queensland, inner route—Hope island.

Scott rock—Its non-existence reported.

No. 233 (first publication).—The British Admiralty has given notice (No. 452 of 1904) that information, dated 14th February 1903, has been received from Commander F. C. C. Pasco, H. M. Surveying vessel *Dart*, that he has, in varying conditions of weather, closely examined the area around the charted position of Scott rock, and that the soundings obtained give no indication of danger, and that no breakers were seen, and though the water frequently appeared discoloured in patches, shoaler depths were not found than in the other parts of the locality not so discoloured.

This rock was reported in 1873 by Mr. R. F. Scott, Master of the Schooner *Three Brothers*, as a dangerous shoal patch over which the water was breaking, but no soundings appear to have been taken. It is highly probable that Mr. Scott saw one of the above-mentioned patches of discoloured water in rough weather, and mistook it for a shoal breaking,

for had such a shoal as he describes existed, it must assuredly have been found in the thorough search recently made by the *Dart*. Scott rock has in consequence been expunged from the Charts.

Approximate position, lat. 15° 34¾′ S., long. 145° 23¾′ E.

This Notice affects the following Admiralty Charts :—Coral sea, No. 2764; Hope islands to Turtle group, No. 2923 : Also, Australia Directory, vol. II, 1898, page 346.

Approximate position, lat. 17° 45¼ N., long. 120° 23¼′ E.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ●, continued rain.

Provided that the Sub-Registrar may sign for a Dome who is unable to write.

17. When the Sub-Registrar at any burning-ghât shall be satisfied after due inquiry that any person, whose corpse shall be brought for cremation from any place other than a public institution, has died without any means of subsistence, he shall allow such corpse to be burnt at the cost of the Corporation.

Provided that such corpses shall be burnt either at the Kashi Mitter's burning-ghât, or at the Shahnagore burning-ghât, and if taken to any other ghât shall be sent by the Sub-Registrar to one or other of the above-mentioned ghâts.

18. Yang Tse and Hwang ho kao rivers—Non-existence of shoals and banks between.

No. 237 (first publication).—The British Admiralty has given notice (No. 461 of 1904) that the area in the offing, between the mouths of the Yang tse and Hwang ho kao rivers, having been examined by Captain M. H. Smyth, H. M. Surveying vessel *Rambler*, it is considered that the existence of the undermentioned shoals and banks has been disproved, and, as their existence depended on doubtful evidence, they have been expunged from the Charts, viz. :—

CHINA SEA—SOUTH NATUNA ISLANDS.

Robin Hood reef—Amended position of.

No. 238 (first publication).—The British Admiralty has given notice (No. 464 of 1904) that Robin Hood reef, which is about 5½ cables long in an easterly and westerly direction, is situated in lat. 2° 48′ 25″ N., long. 108° 59′ 10″ E. This places it about 4½ miles N. 53° E. from the northern extremity of Pulo Panjang, and not as at present shown on the Charts.

(Variation 2° Easterly in 1904.)

This Notice affects the following Admiralty Charts :—China sea, southern portion, No. 2660a; South Natuna islands, No. 2104 : Also, China Sea Directory, vol. II, 1899, page 83.

PACIFIC OCEAN—GILBERT ISLANDS.

Nonuti—Position of beacon altered—Leading line unavailable.

No. 239 (*first publication*).—The British Admiralty has given notice (No. 466 of 1904) that the Master of the S.S. *Titus* reports that the stone beacon on Tipurao sandbank, in the approach to Nonuti, having been washed away, another beacon has been erected on the southern point of the bank; this beacon in its new position must not be used as a leading mark, as in line with the conspicuous gap it would take a vessel amongst the shoal heads to the southward of the track recommended. The former leading line has, therefore, been expunged from the Chart.

Approximate position, lat. 0° 41′ S., long. 174° 21′ E.

This Notice affects the following Admiralty Chart:—Nonuti, No. 3338: Also, Pacific Islands, vol. II, 1900, page 265; and Supplement, 1903, page 12.

EASTERN ARCHIPELAGO—FLORES SEA.

Tana Jampea—Reef to the north-westward—Non-existence of reef to the south-eastward.

No. 240 (*first publication*).—The British Admiralty has given notice (No. 471 of 1904) that the reef, marked D, shown on the Chart at a distance of 10 miles N. 66° W. from the north-west point of Tana island, was found to be 5 miles in circumference, steep-to, and nearly always dry, it is composed of stones, and has a fisherman's hut on its eastern side. D has, therefore, been erased from the Charts.

Approximate position, lat. 6° 56¼′ S., long. 120° 28′ E.

Also, that the reef, shown on the Charts at a distance of 9 miles S. 70° E. from the western point of Tana Jampea, does not exist, a sounding of 1,180 fathoms was obtained over its reported position, and no indication of shoal water was observed. Captains of mail steamers, and local pilots, also state that there is no reef in this position. As the authority for its existence is vague and uncertain, it has been erased from the Charts.

Approximate position, lat. 7° 9′ S., long. 120° 57′ E.

(Variation 2° Easterly in 1904.)

This Notice affects the following Admiralty Charts:—Eastern Archipelago, Nos. 941b and 942a; Lombok to Flores, No. 1696: Also, Eastern Archipelago, part II, 1893, page 288.

EASTERN ARCHIPELAGO—LOMBOK ISLAND, NORTH-WEST COAST.

Siwa reef—Non-existence of.

No. 241 (*first publication*).—The British Admiralty has given notice (No. 472 of 1904) that a careful, but unsuccessful, search has been made for Siwa reef, off the north-west coast of Lombok, no bottom could be obtained in its vicinity with from 37 to 250 fathoms of line out, nor was discoloured water, or any other indication of danger observed.

This reef was reported by a local vessel in 1847, but it is assumed that the vessel mistook Papak point for the northern extremity of Lombok, and in consequence observed one of the numerous shoals to the northward of Sirah point; Siwa reef has therefore been erased from the Charts.

Approximate position, lat. 8° 16′ S., long. 116° 7′ E.

This Notice affects the following Admiralty Charts:—Eastern Archipelago, No. 941b; Island of Java, No. 1654: Also, Eastern Archipelago, part II, 1893, page 227.

CHINA SEA—SULU ARCHIPELAGO.

Datu Batu—Shoal to the south-eastward.

No. 242 (*first publication*).—The British Admiralty has given notice (No. 473 of 1904) that a sounding of 5 fathoms was obtained from the S.S. *Tablas* on the southern edge of a shoal, with the northern-eastern extremity of Datu Bato bearing N. 34° W., distant about 1½ miles. From this position, on a N. 74° E. course, similar depths were obtained for 2 miles, after which the sounding increased to 6 and 7 fathoms, when the western end of Sipang bore N. 16° E., distant about 3 miles. This shoal, which appeared to be detached, has been placed on the Charts as Tablas shoal.

Approximate position, lat. 5° 54′ N., long 120° 21′ E.

Scott rock—Its non-existence reported.

No. 233 (second publication).—The British Admiralty has given notice (No. 452 of 1904) that information, dated 16th February 1903, has been received from Commander F. C. C. Pasco, H. M. Surveying vessel *Dart*, that he has, in varying conditions of weather, closely examined the area around the charted position of Scott rock, and that the soundings obtained give no indication of danger, and that no breakers were seen, and though the water frequently appeared discoloured in patches, shoaler depths were not found than in the other parts of the locality not so discoloured.

This rock was reported in 1873 by Mr. R. F. Scott, Master of the Schooner *Three Brothers*, as a dangerous shoal patch over which the water was breaking, but no soundings appear to have been taken. It is highly probable that Mr. Scott saw one of the above-mentioned patches of discoloured water in rough weather, and mistook it for a shoal breaking, for had such a shoal as he describes existed, it must assuredly have been found in the thorough search recently made by the *Dart*. Scott rock has in consequence been expunged from the Charts.

Approximate position, lat. 15° 34¾′ S., long. 145° 23¾′ E.

This Notice affects the following Admiralty Charts:—Coral sea, No. 2764; Hope islands to Turtle group, No. 2923: Also, Australia Directory, vol. II, 1898, page 346.

FIRST FORECAST OF THE JUTE CROP IN BENGAL FOR THE SEASON, 1904.

The 16th July 1904.—The following note is published for general information.

A. EARLE,
Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First forecast of the Jute Crop in Bengal for the season 1904.

Explanatory.—Returns are received from 26 districts in Bengal, the area under jute in the remaining districts being insignificant.

About two-thirds of the crop is grown in Eastern Bengal (Mymensingh, Tippera, Dacca, Pabna, Rajshahi, and Bogra districts) and one quarter in Northern Bengal (Rangpur, Dinajpur, and Jalpaiguri districts).

The present forecast of the area sown and prospects of the crop is based upon reports of Collectors received up to the end of the first week of July and upon local inquiries by officers of the Department, including the Director.

Character of the season.—The districts of Mymensingh, Tippera, and Rangpur, in which nearly half the jute crop is grown, were visited with very heavy rain in the early part of the season and this has affected prospects. From the other important districts, especially Faridpur and Dacca, the reports of the weather have generally been favourable, but weeding has been hindered by heavy rain in Dinajpur, Bogra, and Jessore.

Area cultivated.—Special inquiries are being made by Collectors, assisted by officers of this Department, and the reports are still being tested.

Normal area.—The normal area has not therefore been raised in this forecast and is the same as in the final forecast of last year—2,470,000 acres. Collectors of the following districts have, however, reported larger normal areas:—

	Acres.		Acres.
24-Parganas	88,300	instead of	63,400
Jessore	62,100	„	40,800
Dinajpur	130,400	„	102,000
Rangpur	417,000	„	340,000
Pabna	182,000	„	144,800
Dacca	189,900	„	171,000
Mymensingh	750,000	„	705,000
Faridpur	140,000	„	100,000
Noakhali	6,700	„	4,500
Purnea	291,000	„	55,000
Cuttack	7,800	„	4,800

The increase amounts to 533,900 and is explained in various ways by Collectors; *e.g.*, underestimates in previous returns, good prices and good harvests.

Area under cultivation in 1904.—For the same reasons as are given for the increase in the normal area and also in some districts on account of favourable weather at the time of sowing, there is a large increase in the area under jute this year, viz., 2,793,400 as against an area estimated in the final forecast of 1903 at 2,470,000. The increase is in the districts mentioned in the previous paragraph. The Purnea figures certainly and some of the others require further verification, and inquiries will be made. There is no doubt that a very much larger area than usual has been sown, though in East Mymensingh and Tippera some of the crop has been ploughed up. It is safe, I think, to estimate an area under crop this year of 2,700,000 acres.

Prospects.—Collectors' estimates work out to 81 per cent. Allowing for underestimates, *e.g.*, Faridpur returns 100 per cent. but is believed to have a bumper crop, and provided no unfavourable conditions develope, the prospects are now of a crop amounting to 87½ per cent. (14 annas) in the area sown. This means not less than 93¾ per cent. (15 annas) of what has been known in the last few years as a normal crop.

Stocks of the crop of 1903 are reported by all Collectors to be low.

Telegraphic summaries from the principal jute-growing districts of the weather and prospects of the crop will be published on Wednesday, July 20th, and every Wednesday till the final forecast is issued at the office of the Board of Revenue and at the Royal Exchange.

Presidency—*concld.*	Murshidabad ...	1,371,520	985,500	21,700	15,000	20,300	97	95	Little ...	Increase in area sown is due to seasonable rainfall and to increase of area available by abandonment of Laltakuri embankment.	
	Jessore	1,872,000	1,203,800	40,800*	30,700	55,700	77	69	Do. ...	Early rains induced the cultivators to sow more lands with jute than last year, but subsequent heavy rains have damaged the young plants in different quarters. Hence the lower estimate of outturn.	* The Collector proposes to raise the normal area to 62,100 acres
	Khulna	3,103,942	570,000	20,500	9,100	9,750	86	96	Do. ...	Timely rainfall has resulted in the increase of area and outturn.	
	Rajshahi	1,663,040	1,262,100	105,700	84,000	105,600	60	100	Do. ...	The prospects are so far favourable.	
	Dinajpur ...	2,526,060	1,697,690	102,000†	60,000	102,600	85	75	Very little	The increase in area sown this year is due to timely rainfall. The expected short outturn is ascribed to excessive rain after sowing.	† The Collector proposes to raise the normal area to 130,400 acres.

Rajshahi ..	Jalpaiguri ...	1,594,000	925,000	70,900	66,100	59,700	70	80	None	Heavy rainfall during the sowing season rendered weeding impracticable. Hence the outturn is below the normal.	
	Darjeeling (plains) ...	744,960	148,200	2,500	2,200	1,700	50	70	Practically none.	The apparent decrease in the area under cultivation this year is accounted for by the fact that last year the area was guessed at, while this year's statistics have been obtained from each outpost.	
	Rangpur ...	2,295,520	1,224,900	340,000 ‡	302,200	312,750	75	69	Very little	Decrease in outturn is due to excessive, untimely rains at the weeding season.	‡ The Collector proposes to raise the normal area to 417,000 acres.
	Bogra	989,760	622,900	96,000	72,000	90,000	78	78	Ditto ...	Incessant rain at the time of weeding retarded the work and did some injury to the crop. Hence better outturn cannot be expected.	
	Pabna ...	1,176,960	865,300	144,800 §	140,000	193,300	85	87·5	No jute remains.	The high price of jute last year has caused an increase of area sown. Excessive rainfall has caused some damage to the crop.	§ The Collector proposes to raise the normal area to 182,000 acres.
Dacca ...	Dacca	1,730,480	1,213,500	171,000 ‖	171,000	191,800	85	100	Little ...	On account of timely rainfall a better outturn than last year is expected.	‖ The Collector proposes to raise the normal area to 189,900 acres.
	Mymensingh ...	4,062,480	2,405,000	[illegible] ¶	[illegible]	725,000	57	75	Nil ..	The short outturn is due to excessive rain at the beginning of the season.	¶ The Collector proposes to raise the normal area to 750,000 acres.
	Faridpur	1,459,840	1,132,600	100,000 **	95,000	153,000	56	100	Very little	The sowing season this year was very favourable. Nearly 10 per cent. more has been sown with jute.	** The Collector proposes to raise the normal area to 140,000 acres.
	Backergunge ...	2,335,360	1,418,000	10,000	10,000	10,000	50	50	Little ...	The excessive rainfall has damaged the crop. Hence the outturn is estimated to be much below the normal.

	Malda	1,216,000	716,500	32,500	24,300	27,600	75	80	Very little	The increase both in area and outturn is due to sufficient rainfall at the time of cultivation.	

Orissa ...	Cuttack	2,322,560	1,161,300	4,800†	5,900	9,200	100	87	Very little	The increase of area under cultivation this year is due to a very large demand for jute by foreign traders during the last two years. The area under jute in Kendrapara subdivision is nearly doubling every year. The outturn is estimated at 14 annas owing to the deficiency of rainfall at sowing time.	† The Collector proposes to raise the normal area to 7,800 acres.
	Balasore ...	1,334,368	870,800	2,600	5,300	5,200	95	100	Little ...	The weather is favourable to jute cultivation.

I have increased the estimate to 87½, against last year's 93¾ per cent. But in my opinion this 87½ per cent. represents at least 93¾ per cent. or 15 annas of what in previous years was known as a normal crop.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JUNE 1904.

THE weather at the end of May was of the usual sultry character which distinguishes the period immediately preceding the break of the rains. It is true that the mean temperature was somewhat below the normal, as it had been during the greater part of May, but the lightness of the winds at the head of the Bay and the humidity of the atmosphere were sufficient to make the weather over the province assume that character which is generally described as moist and muggy. The monsoon current had by the beginning of the month established itself firmly over the south of the bay, and during the first few days of June there were indications of unsettled weather in the centre of the bay which seemed to point to a further advance northward. The disturbed state of the weather in this quarter did in fact develope into a small cyclonic storm on the morning of the 3rd, somewhat to the south-west of Diamond Island. Conditions, however, in the north of the bay were not yet favourable for the advance of a depression in the usual north-westerly direction, and it was in consequence diverted to the north-east crossing the Burma coast near Diamond Island early on the same day on which it was first noticed. Though no longer well defined, it apparently moved in a northerly direction during the next few days, skirting the Arakan coast and affecting the weather in that quarter to a considerable extent. The actual storm may be said to have ceased to exist by the 5th, yet disturbed conditions undoubtedly continued to travel slowly along the Arakan and Bengal coasts in succession, culminating finally in a well-marked depression on the morning of the 9th. The sultriness of the weather during this period had increased steadily in Bengal, owing to the prevailing calms, the rising temperature and the almost entire absence of rainfall, and relief was only obtained after the depression, which on the 10th had developed into a small cyclonic storm at the head of the Bay, began to move slowly in a north-easterly path across the Province, ultimately breaking up in the Assam hills. General rain, followed by a welcome fall of temperature, accompanied its passage across the country, but the precipitation in the western districts was, as might have been expected from the course of the storm, very light and scattered. The barometer which at the beginning of the month had been in moderate excess began to fall in the early days of the month even before the formation of this depression, and the fall was naturally accelerated during the period of its development. As at the same time a rise of pressure was taking place in the south, a very strong monsoon current had as early as the 8th established itself over the whole of the bay area. With the final disappearance of the storm on the morning of the 12th, the pressure distribution became again more normal, but this reversion to ordinary conditions was accompanied by a slight retreat of the monsoon current from the head of the Bay. This retreat, however, was only of a temporary character, and a fresh advance of the monsoon was heralded by the appearance of a depression off the Orissa coast on the morning of the 15th. During these few days rain had diminished largely, and had indeed ceased almost entirely over the greater part of the country. Temperature naturally increased at the same time, but notwithstanding this rise, it was below the normal on the 15th except in the east of the Province. During the 16th and 17th the storm developed slowly, and then during the next few days moved slowly in a westerly direction into the Central Provinces. It was accompanied by general though not very heavy rain, that in the east and north of the province being specially light. Pressure which even after the disappearance of the former storm on the 12th was considerably below the normal over the province, now began to rise sharply, but notwithstanding this recovery still remained in defect at the time of the appearance of the new depression on the 18th. With the development of the storm it naturally commenced to fall once more, so that on the 18th there was considerable defect throughout. Temperature likewise had fallen with the advance of the storm, but notwithstanding small variations high temperature showed a tendency to maintain itself on the eastern and northern parts of the country, the excess appearing chiefly in day temperatures. During the whole of this period the current in the Bay continued far above average strength, an excess which it maintained up to the end of the month. Under the influence of this strong monsoon normal conditions, with general though for the most part light rainfall, prevailed from the 19th to the 24th, on which date symptoms of a fresh disturbance became manifest at the head of the Bay. The course of the latter disturbance was a most unusual one. Though a well-marked depression actually existed, it remained for many days shallow and diffused, and the central regions, into which the feeble winds to which it gave rise were feeding, shifted its position from day to day, so that it may almost be said to have described a circular path passing from the head of the Bay inland to the vicinity of Burdwan on the 25th, then slightly northward on the 26th, then to the west on the 27th, to the south on the 28th, and finally emerging at the head of the bay at the end of the month. At no period of its course was the intensity of the disturbance more than slight, as might have been gathered from its unusual path: as soon, however, as it finally emerged into the bay, it developed in the beginning of July into a storm of considerable strength, and then moved inland once more, observing now however in its path a somwhat more normal direction. During the whole of this period of disturbance the rainfall was fairly general, but for the most part light, the only exception being heavy falls which occurred in Bihar on the 27th and 28th.

During these latter days of the month up to the 28th temperature changed but slightly, and with small variations these continued to be excess in the north and east and defect in the

remaining parts of the province. On the 28th, however, a general rise took place, and temperature was above the normal over almost the whole province on the last day of the month.

From the 17th pressure commenced to rise, and on the 21st was at last once more above the average. A fall, however, speedily set in on the 22nd, and continued till the 26th. Though there was a slight recovery on the 27th and 28th, there was still deficiency on the latter date, a deficiency which was accentuated by the further considerable fall, which took place during the last days of the month. It will be seen that the weather in June was chiefly influenced by the progress of the several disturbances, which followed one another during the month. Of these, the first, whose place of origin as well as subsequent path were both unusual can perhaps hardly be said to have affected the weather of Bengal except in so far as it diverted the rainfall from the province. There is no doubt, however, that the unsettled conditions which it left behind were the immediate cause of the development of its successor which subsequently moved into Assam. This latter storm, which practically constituted the first burst of the monsoon, gave considerable rain to Bengal Proper and Assam; but, as is usual with an early advance of the monsoon current, was followed by a temporary break, which was, however, in this case of very short duration.

The permanent advance of the monsoon current may be said to have taken place with the formation of the third storm on the 17th, the usual date for the breaking of the rains in Lower Bengal. After this the monsoon may be regarded as having been fully established. Attention has already been called to the unusual nature of the disturbance which characterised the latter days of the month, and which finally culminated in a cyclonic storm at the head of the Bay. When a storm has once been fully developed, it is probable that at this time of the year, it never moves out from the mainland to the head of the bay, but when the disturbance is, though well marked, widely diffused and not completely formed, it seems possible from the present example that the central regions into which the indraught of the still feeble winds is taking place, may shift its position from day to day, and, under these circumstances, even drift out to sea, when of course its chances of developing into a cyclonic storm are materially increased. In this sense and in this sense only can it be said that a storm at the season of the year has moved from the land area into the head of the Bay.

Summary of pressure.—Pressure was in defect during the great part of the month. Though above normal at the end of May, it very early began to fall and only for a few days towards the end of the month again reached its former high point. Mean pressure is consequently below the normal over the whole province, the greatest defect occurring at Krishnagar where it amounts to nearly $\frac{1}{15}$th of an inch.

Summary of temperature.—Mean temperature was in defect except in North Bihar and North and East Bengal, where there was excess. But the defect and the excess are chiefly shown in day temperatures, the departure from the normal in night temperatures being for the most part very slight throughout. The greatest variation from the average temperature is shown at Gaya where there was a deficiency of $4\frac{1}{4}°$. The regions of departure from the normal coincide very nearly with the corresponding regions of excess or defective rainfall.

Summary of rainfall.—There was practically no rainfall over the province during the first seven or eight days of the month. General rainfall accompanied the passage of the first storm across the country, but it was comparatively light in the western districts. A small break followed the disappearance of this storm, but with the formation of the succeeding depression rain again recommenced, and was fairly continuous and widespread during the remainder of the month. The conditions, however, were such as to determine the precipitation more particularly to the south-western portion of the province, and in consequence rainfall was below the average in North and East Bengal. The deficiency is most marked in the former Division, where it amounts to nearly 50 per cent. In East Bengal it is only 17 per cent. In South-Western Bengal and Bihar the rainfall was practically normal, while in Orissa and Chota Nagpur there was considerable excess. The totals, however, for the first six months of the year are still either normal or above normal.

The following table gives the rainfall of the various Divisions of Bengal in June and in each of the previous months of the present year as compared with the normal values for the same periods. The figures given represent the actual falls expressed as percentages of the normal falls:—

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed by the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers.

Tana Jampea—Reef to the north-westward—Non-existence of reef to the south-eastward.

No. 240 (second publication).—The British Admiralty has given notice (No. 471 of 1904) that the reef, marked D, shown on the Chart at a distance of 10 miles N. 66° W. from the north-west point of Tana island, was found to be 5 miles in circumference, steep-to, and nearly always dry, it is composed of stones, and has a fisherman's hut on its eastern side. D has, therefore, been erased from the Charts.

Approximate position, lat. 6° 56½′ S., long. 120° 28′ E.

Also, that the reef, shown on the Charts at a distance of 9 miles S. 70° E. from the western point of Tana Jampea, does not exist, a sounding of 1,180 fathoms was obtained over its reported position, and no indication of shoal water was observed. Captains of mail steamers, and local pilots, also state that there is no reef in this position. As the authority for its existence is vague and uncertain, it has been erased from the Charts.

Approximate position, lat. 7° 9′ S., long. 120° 57′ E.

Siwa reef—Non-existence of.

No. 241 (second publication).—The British Admiralty has given notice (No. 472 of 1904) that a careful, but unsuccessful, search has been made for Siwa reef, off the north-west coast of Lombok, no bottom could be obtained in its vicinity with from 37 to 250 fathoms of line out, nor was discoloured water, or any other indication of danger observed.

This reef was reported by a local vessel in 1847, but it is assumed that the vessel mistook Papak point for the northern extremity of Lombok, and in consequence observed one of the numerous shoals to the northward of Sirah point ; Siwa reef has therefore been erased from the Charts.

Scott rock—Its non-existence reported.

No. 233 (third publication).—The British Admiralty has given notice (No. 452 of 1904) that information, dated 16th February 1903, has been received from Commander F. C. C. Pasco, H. M. Surveying vessel *Dart*, that he has, in varying conditions of weather, closely examined the area around the charted position of Scott rock, and that the soundings obtained give no indication of danger, and that no breakers were seen, and though the water frequently appeared discoloured in patches, shoaler depths were not found than in the other parts of the locality not so discoloured.

This rock was reported in 1873 by Mr. R. F. Scott, Master of the Schooner *Three Brothers*, as a dangerous shoal patch over which the water was breaking, but no soundings appear to have been taken. It is highly probable that Mr. Scott saw one of the above-mentioned patches of discoloured water in rough weather, and mistook it for a shoal breaking, for had such a shoal as he describes existed, it must assuredly have been found in the thorough search recently made by the *Dart*. Scott rock has in consequence been expunged from the Charts.

3. A statement showing the receipts and expenditure of the fire-brigade is annexed to this report. The year opened with a balance of Rs. 23,885-8-4, the receipts amounted to Rs. 88,462-6, and the total expenditure to Rs. 90,321-12-10, leaving a balance of Rs. 22,026-1-6 at the close of the year.

Receipts.—Fees under the Petroleum Act realised Rs. 820 as against the estimate of Rs. 400. Hire of fire-engines Rs. 834-12 as against Rs. 20, and the sale of unserviceable hose and engine Rs. 2,183-2 as against Rs. 100. The net result was an actual increase of Rs. 3,248-6 over the estimates.

Expenditure.—

(*a*) The decrease under the head of Establishment, represents savings due to vacancies in the rank of khalasis, and to the increased pay provided for them in the Budget, not having been sanctioned until late in the year.

(*b*) Contingencies, there were savings chiefly under the following heads :—

	Rs.	A.	P.	
Feed and keep of horses	1,147	8	4	due to economy.
Cost of a new engine with fittings ...	2,194	12	0	
Repairs of engines and vans ...	660	11	6	
Allowance for attendance at fires ...	460	0	0	
Pension	309	11	0	
Hose	322	0	3	

the net decrease being Rs. 5,240-10-10.

(c) Under "Other charges" there was a net saving of Rs. 845-9-5, the decrease falling chiefly under "Water pressure" and "Leave allowance" of subordinates.

The surplus in the opening balance of the year, the improvement in the receipts and the considerable savings in expenditure, have contributed to the large closing balance of Rs. 22,026-1-6, against Rs. 8,000 provided for in the estimates. Out of Rs. 14,026-1-6, in excess, a sum of Rs. 12,000, estimated in the Budget estimate for 1904-1905 as the anticipated closing balance of the year under report, has been taken as a set-off in determining the contribution payable by the several municipalities during the current year.

4. The following table gives the number of fires and the way they were dealt with:—

Description of fire.	Number of fires.	Number of fires attended by fire-brigade.	Number of fires extinguished by residents.	Number of fires attended by Port Fire Engines.

CALCUTTA,

The 8th July 1904.

F. L. HALLIDAY,

Offg. Commissioner of Police, Calcutta.

The 20th July 1904.—The following extracts from the Resolution and Returns of the Board of Revenue on the working of the Income-tax Department in Bengal in the year 1903-1904 are published for general information.

L. P. SHIRRES,

Secretary to the Govt. of Bengal.

RESOLUTION.

INCOME-TAX BRANCH.

K. G. GUPTA, ESQ., I.C.S.

Dated Calcutta, the 9th July, 1904.

THE statistical information regarding the Income-tax Department, for the year 1903-04, has been compiled with reference to the Government of India's Resolutions Nos. 2316S.R., dated the 8th May, 1901, and 838.R., dated the 14th January, 1903.

* * * * * * *

2 The receipts, charges and net revenue of the years 1902-03 and 1903-04 are compared below:—

YEAR.		Receipts.	Charges.	Percentage of charges.	Net revenue.
		Rs.	Rs.		Rs.
1903-04	...	49,61,823	1,94,938	3·9	47,66,885
1902-03	...	58,66,787	2,12,463	3·6	56,54,324
		—9,04,964	—17.525	+·3	—8,87,439

The net revenue showed a decrease of 15·7 per cent., as compared with an increase of 3·9 per cent. in 1902-03, this result being due to the enactment of Act XI of 1903, raising the minimum income assessable to Income-tax. Deducting collections on incomes below Rs. 1,000 from the receipts of the previous year, the net revenue for the year under report shows an increase of Rs. 1,16,693, or 2·5 per cent.

3. *Return No. III.*—The collections under Parts I, II and IV showed a decrease of Rs. 1,47,642, Rs. 92,572 and Rs. 6,62,604, or 11·8, 14·03 and 18·3 per cent., respectively. On the other hand, the realizations from interest on securities showed an increase of Rs. 5,882, or 6·4 per cent. in comparison with the preceding year. If the collections on incomes below Rs. 1,000 be deducted from those of the preceding year, the year under report would show an increase of Rs. 52,881, or 5·04 per cent. under Part I, and of Rs. 86,521, or 3·009 per cent. under Part IV, while the collections under Part II, would show a decrease of Rs. 92,270, or 14 per cent., which is ascribed to depression in the coal trade and to a falling off in the profits of jute mills and presses.

4. *Returns Nos. V and VI.*—The number of persons finally assessed decreased by 74,631, or 59·2 per cent., while the final demand for the year fell by Rs. 8,51,746, or 16·1 per cent. The elimination of assessees with incomes below Rs. 1,000, therefore, has relieved more than one half of the former assessees, while resulting in a decrease of only one-sixth of the demand. Excluding the exemptions under the recent legislation, the number of persons finally assessed and the final demand for the year under report rose by 5,036 persons and by Rs. 27,774, or by 10·8 and ·6 per cent. respectively, as compared with a rise of 1·7 and 2·9 per cent. respectively during 1902-03, in comparison with the preceding year.

5. The percentage of collections on the final demand for the year was 96 04, as compared with 96·6 during 1902-03. The districts of Birbhum, Bankura, Murshidabad, Bogra, Dacca, Backergunge, Tippera, Noakhali, Gaya, Champaran, Darbhanga, Malda, Cuttack and Palamau succeeded

in collecting the entire demand within the year The prescribed standard of 95 per cent. was attained in all the other districts excepting Calcutta and Burdwan, where the percentages were 93·8 and 93·5, respectively. The deficiency in Calcutta during the year was due to the fact that assessments amounting to Rs. 1,02,370 were made during the last quarter of the year, while in Burdwan the non-payment of the tax of Rs. 4,142 by one assessee affected the results adversely.

With the disappearance of the smaller assessees the percentage of collections should exhibit an improvement as soon as the partial disorganisation occasioned by the change in the limit of assessable incomes has subsided.

6. *Return No. VII.*—The total cost of assessment and collection of the tax during the year shows a decrease of Rs. 17,525, or 8·2 per cent., in comparison with the previous year, owing to the curtailment of the clerical establishments entertained both in the Collectors' and Commissioners' offices, including the office of the Collector of Income-tax, Calcutta, and to the reorganization of the Warrant Establishment in Calcutta by the abolition of the posts of two bailiffs and the employment of permanent peons in the place of the *ticca* peons formerly entertained. The reorganisation of the assessors' establishment will have effect from the current year, and the charges of the Department will then be still further reduced.

The 20th July 1904.—The following Resolution by the Board of Revenue regarding the administration of the Stamp Department in Bengal in the year 1903-1904 and an abstract of the receipts and charges for the year are published for general information.

L. P. SHIRRES,

Secretary to the Govt. of Bengal.

RESOLUTION.

STAMPS.

K. G. GUPTA, ESQ., C.S.

Dated Calcutta, the 5th July 1904.

1. THE annual statistics of the Stamp Department for the year 1903-1904 have been compiled in the prescribed Statements I to VII.

2. *Statement I.*—The figures of general receipts and charges for the year 1903-1904, though obtained from the Accountant-General, have not as yet been finally verified, and are therefore liable to subsequent adjustment.

3. The revenue collected under the Stamp and Court-fees Acts amounted to Rs. 1,98,35,542 against Rs. 1,95,70,438 in the previous year, showing an increase of Rs. 2,65,104. The figures adopted in the revised budget estimate for the year were Rs. 1,96,00,000, or Rs. 2,35,542 less than the actual realisations. The increase of revenue was obtained under the head of Judicial stamps.

The total charges during the year amounted to Rs. 5,24,914, being an increase of 5·9 per cent. over the figures for 1902-1903 which was mainly under 'refunds.'

4. *Statements II and III.*—The statistics of receipts from the sale of the different kinds of stamps under the heads Judicial and Non-Judicial in the several districts have been compiled mainly from the figures furnished by the Superintendent of Stamps, Calcutta. There is a discrepancy of Rs. 88 between the figures of total receipts in these statements and those furnished in Statement I, which cannot be reconciled until finally verified statistics are received from the Accountant-General.

5. The sale-proceeds of Court-fee stamps, excluding stamps for copies, rose from Rs. 1,31,09,068 to Rs. 1,34,39,977, that is, by Rs. 3,30,909. The greater portion of the increase was contributed by the districts of Monghyr (Rs. 54,607), Tippera (Rs. 46,175), Patna (Rs. 37,930), Backergunge (Rs. 36,407), Burdwan (Rs. 26,367), Dacca (Rs. 24,978), Bhagalpur (Rs. 22,341) and Noakhali (Rs. 21,938). The increase in Monghyr is attributed by the Collector to the institution during the year of a large number of civil suits which had been withheld in the preceding year on account of plague. The increase in the district of Patna was due to the institution of a larger number of cases under the Indian Succession Act, 1865. The increase in other districts is generally attributed to the increased number and value of civil and rent-suits.

The largest decrease (Rs. 48,246) occurred in Gaya, and is attributed to the prevalence of plague which kept people away from the Courts. The decrease (Rs. 19,526) in Darbhanga is ascribed by the Collector to a marked falling off in the number of rent-suits, which had increased abnormally in the years immediately following the recent settlement operations in the district.

6. There was a net decrease of Rs. 62,903 in the receipts from the sale of non-judicial stamps, due to a decline in the receipts under the heads of impressed stamps, impressed labels, and notarial stamps. The revenue derived from the sale of impressed stamps amounted to Rs. 34,89,903, in comparison with Rs. 35,59,667 in the preceding year. The number of deeds executed was fewer, for which it is not possible to give any particular explanation. The revenue derived from the sale of *hundis*, or inland bills-of-exchange, was Rs. 1,31,860, showing an increase of Rs. 6,374 as compared with the receipts of the preceding

year. The receipts from the sale of impressed labels, which are used only in Calcutta, were noticeably smaller than in the preceding year, when the receipts were abnormally large. There was a satisfactory increase in the sale of one-anna receipt stamps, especially in Calcutta. The increase in the sale of forms for cheques or receipts is attributed to the larger issues of cheque books to District and Local Boards, and to the growth of trade in Calcutta.

7. *Statement IV.*—The total number of vendors for the sale of judicial and non-judicial stamps during the year was 6,253, or a decrease, as compared with the previous year, of 568 persons. A considerable reduction in the number of vendors was effected in the district of Chittagong, where the stamp vendors' register was overhauled during the year.

The discount allowed during the year exceeded that of preceding year by Rs. 1,783,—the result of the increased sales.

8. *Statement V.*—The total number of cases in which deficient duty and penalty were levied by the Courts during the year shows a decrease of 38, and there was a decrease of Rs. 78 in the amount of duty and penalty realised in comparison with the figures of the preceding year. On the other hand, there was an increase of 3 in the number of cases decided, but a decrease of Rs. 19,562 in the duty and penalty realised by Revenue Officers as compared with the figures of 1902-1903. The decrease occurred mainly in Calcutta, where there had been an abnormal increase in the previous year.

9. *Statement VI.*—The number of cases instituted for the infringement of the provisions of the Stamp Act was 356, in which 376 persons were brought to trial, against 220 cases and 252 persons in the preceding year. The fines imposed amounted to Rs. 3,747 in comparison with Rs. 1,557, while the amount distributed in rewards was Rs. 2,420 against Rs. 551.

10. *Statement VII.*—Of the cases of the valuation of estates for the issue of probates or letters of administration reported during 1903-1904, 81·1 per cent. were enquired into. The corresponding percentage in the preceding year was 78·2. The proportion borne by the deficit duty realised to the amount originally paid was 8·2 per cent., as compared with 14·0 per cent. in the previous year.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers.
